

ShopControlPro®

Robust Microsoft® SQL Server Windows Software
for Jewelry Manufacturers & Wholesalers

Features

◆ SCP- ERP™

A total, integrated system with suggested order quantity calculations, order scheduling, inventory control, purchasing, memorandums (in and out), EDI, sales, invoicing, customer specific pricing, manufacturing order tracking, loss control by quantity, metal weight, and stone weight.

◆ Product Database

Item master, costing, bill of materials, routing, 4 images per item, diamonds, colored stones, castings, findings.

◆ Retail Module

Integrates with GEMINI®, our state-of-the art jewelry retail product.

GEMINI® can manage one or multiple stores with SQL replication to provide a complete retail solution for manufacturers with retail stores.

The Best Concept

ShopControlPro® (SCP) is software designed to *meet the specific needs* of the jewelry industry. Manufacturers, distributors, wholesalers and retailers around the world depend on SCP to manage their daily operations.

SCP can manage your entire operations in one integrated package designed for your business! ShopControlPro® is packed with features to control products, inventory, sales, purchasing, manufacturing, invoicing, and memorandums.

ShopControlPro® is a product of MPI Systems, Inc., multi award-winning software developers exclusively for the jewelry industry, since 1986.

"Top 100 Client/Server Application" - *InfoWorld* Magazine

ShopControlPro® Features:

Overview

- Built on Microsoft® SQL Server 2005 or 2008.
- Attractive user-customizable tabbed main menu.
- 100% Windows Microsoft® technology
- Multi-user, multi-location, enterprise ready
- Designed for 5 to hundreds of concurrent users
- Unlimited number of security groups each with their own permissions for forms, reports and functions.
- ShopControlPro® utilizes an open database system so *authorized* users can extract data for their own reports and data analysis. Export data to Word, Excel or report writers.
- Transaction tracking throughout

Product Database

- Item Master with full multi-level bill of materials and routings
- Item builder with Cloning and auto-costing
- Image Cross Reference – 4 images per item
- Diamond Certificate store/view/print
