## Features

### ◆ SCP- ERP™

Total inventory control, purchasing, customer management, EDI, sales, orders, invoicing, customer specific pricing, manufacturing order tracking and control.

### ◆ Product Database

Item master, costing, bill of materials, routing, 4 images per item, diamonds, colored stones, castings, findings.

### ◆ Retail Module

Integrates with GEMINI®, our state-of-the art jewelry retail product.

GEMINI® can manage one or multiple stores with SQL replication to provide a complete retail solution for manufacturers with retail stores.

## The Best Concept

ShopControlPro® (SCP) is software designed to *meet the specific needs* of the jewelry industry. Manufacturers, distributors, wholesalers and retailers around the world depend on SCP to manage their daily operations.

SCP can manage your entire operations in one integrated package designed for your business!

**ShopControlPro® is a product of MPI Systems, Inc., multi award-winning software developers exclusively for the jewelry industry, since 1986.**

"Top 100 Client/Server Application" - *InfoWorld Magazine*
