

GEMINI[®] Pro

The Pro version of GEMINI[®] adds Enhanced Features in Manufacturing, Wholesale, and Diamond Management

GEMINI[®] IS A COMPLETE JEWELRY BUSINESS MANAGEMENT SYSTEM for ONE or HUNDREDS of LOCATIONS USING ROBUST MICROSOFT[®] SQL SERVER TECHNOLOGY.

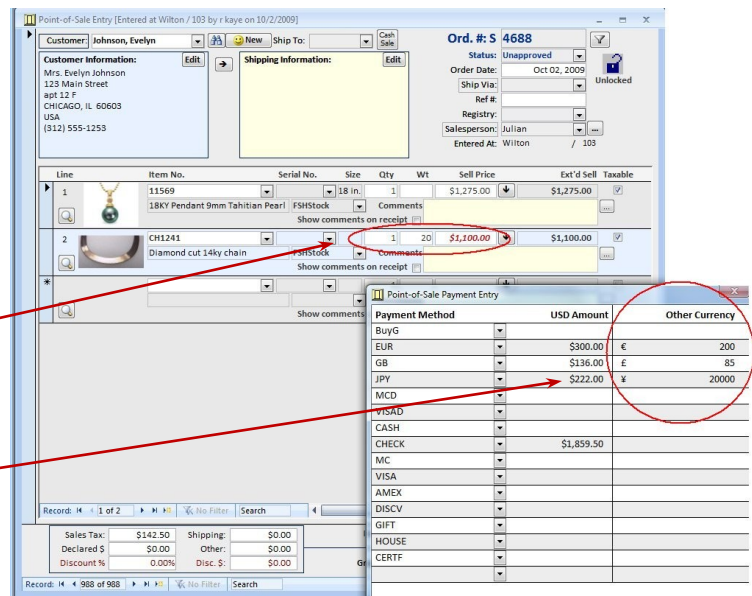

The Pro version of GEMINI[®] adds :

- **Make-to-Stock Manufacturing with Component Requirements Planning**
- **Enhanced Diamond Price & Parcel Management**
- **Sell by Weight & Multi-Currency POS**

The GEMINI[®] special order screen allows you to create customer orders for repairs and special orders, set up estimated labor and materials, print job bags, control component inventory via issues and de-issues to orders. Users record and control job costs by entering actual labor performed. GEMINI[®] analyzes estimated vs. actual labor, and materials for you.

GEMINI[®] Pro is enhanced to also allow you to:

- ◆ **Sell to customers by quantity, gram, pennyweight or carat weight**
- ◆ **Accept payment in multiple currencies including mixed currencies on a sale**
- ◆ **Create make-to-stock orders (without a customer or price)**

GEMINI[®] Pro Point of Sale screen showing sell by weight and multi-currency

GEMINI[®] Pro includes enhanced diamond price management that can import 'Rap' formatted diamond tables from your Rap subscription.

You can compare and update your prices based on your criteria.

Choose GEMINI[®] Pro if you are a jewelry business that:

- Has a workshop or factory, or uses contractors that **make jewelry for your own stock (not just special order)**
- Needs to easily **manage components** required for purchasing special and stock orders
- Accepts payments in **multiple currencies**
- **Sells jewelry or loose stones by weight** (gram, pennyweight or carat)
- **Maintains diamond prices** related to 'Rap' and wants to be able to **re-price diamonds at any time** as a percentage of 'Rap'
- Needs to **inspect and accept or return diamond parcels**
- **Allocate accepted parcels** to specific diamond items with complete cost allocation control
- Wants to integrate with **ShopControlPro[®]**

GEMINI[®] Pro

The GEMINI[®] Pro version offers these *Additional Features* to GEMINI[®]
(See our GEMINI[®] literature for full details of all the features of GEMINI[®])

Make-to-Stock Orders

- The special order screen is enhanced to include 'make-to-stock' capability
- **GEMINI[®] Pro** can generate a Components Required Report detailing items that need to be made or purchased
- Print make-to-stock job bags complete with barcodes, images, bill of materials and suggested labor routing
- Track both estimated *and* actual labor and materials

Sell by Weight

- Set up any item as a 'sell by weight' item
- At the Point of Sale, you are required to enter the actual weight of the item or capture the weight directly from a scale with a direct interface

ItemMaster and Enhancements

- Link any number or files to any ItemMaster such as images, PDFs, docs, spreadsheets, and more. Open any file with a single mouse click

Customer Master & Clienteling Enhancements

- Link any number or files to any Customer, just like on the ItemMaster
- Specify any number of contact names for any customer. This is perfect for customers companies that might have many buyers and other contacts

Multi-Currency

- Accept payment in any currency or mix of currencies
- Enter daily conversion rates and GEMINI[®] Pro maintains historical conversion rates
- **GEMINI[®] Pro** saves conversion rates with each transaction

ShopControlPro[®] Interface

- **GEMINI[®] Pro** interfaces with **ShopControlPro[®]**, our enterprise class system for jewelry manufacturers. Manufacturers with retail operations using **ShopControlPro[®]** now have an integrated solution

Diamond Price File Management

- **GEMINI[®]** has a complete Diamond Master system. **GEMINI[®] Pro** adds the ability to import and update diamond prices globally. Subscribers to Rapaport can **import diamond prices** as often as desired and compare them to current diamond prices
- You can **update all or any of your diamond prices** with discounts you select by size, shape, color, quality

Diamond Parcel Allocation

- With **Diamond Parcel Allocation** you can sort out and categorize a parcel.
- After sorting goods, **GEMINI[®] Pro** compares parcel value vs. standard cost per carat and calculates discount,

Windows[®] 7 & 8 Client Software Logo Test - PASSED
Microsoft[®] SQL Server 2008 R2 & 2012 Test - PASSED

¹Some scales may require 3rd party software to interface to Windows; available at a nominal extra cost
